

# STREAMLINING OPERATIONS FOR A REGIONAL WATER TREATMENT COMPANY

## Background

A regional water treatment company faced challenges managing its scheduling and inventory, leading to inefficiencies and delays. Manual processes resulted in missed appointments and issues due to unavailable parts.

## Challenges

- **Inefficient Scheduling:** Manual scheduling led to errors and missed appointments.
- **Inventory Management Issues:** Inadequate tracking caused delays due to unavailable parts.

## Solutions Offered by Titan Pro Technologies

- **Automated Scheduling:** Implemented ServiceTitan's scheduling system for accurate and timely job assignments.
- **Real-Time Inventory Management:** Integrated automated reordering and real-time tracking to improve inventory control.

## Results

- **Increased Operational Efficiency:** Achieved a 30% improvement in overall efficiency.
- **Reduced Inventory Delays:** Decreased delays related to inventory by 20%.
- **Improved Customer Satisfaction:** Enhanced service delivery led to better customer satisfaction scores.

## Conclusion

Titan Pro Technologies' solutions, including ServiceTitan's advanced scheduling and inventory management features, significantly enhanced the water treatment company's operations, resulting in higher efficiency, reduced delays, and improved customer satisfaction.
